Setup

- **Goal**: Set up the basic structure and environment for the project.
- **Tasks**:
    - Set up version control (Git).
    - Set up the development environment (Node.js, Laravel, database).
    - Design the database schema (Users, Menu Items, Orders, Payments, Deliveries).
- **Deliverables**:
    - Initial Git repository.
    - Database schema in place.

User Management and Authentication

- **Goal**: Implement user registration and login functionality.
- **Tasks**:
    - Develop a user registration (sign-up) system.
    - Implement user login with secure authentication.
- **Deliverables**:
    - Functional user registration and login system.

Menu Management

- **Goal**: Build the menu system for daily food offerings.
- **Tasks**:
    - Create the backend for adding and managing daily menu items.
    - Develop the frontend for displaying the menu to users.
- **Deliverables**:
    - Functional menu system

Order Placement

- **Goal**: Allow users to place and manage their food orders.
- **Tasks**:
    - Build the cart system for adding items.
    - Create the order processing system.
    - Implement order confirmation.
- **Deliverables**:
    - Users can place orders and receive confirmations.

Payment Integration

- **Goal**: Integrate a payment gateway to handle transactions.
- **Tasks**:
    - Set up payment gateway integration (Bank Al-Falah).

- ○ Develop backend logic for processing payments.
  - ○ Handle payment success and failure scenarios.
- **Deliverables**:
  - ○ Secure payment system integrated with order processing.

Week 6: Delivery Tracking

- **Goal**: Provide users with real-time delivery updates.
- **Tasks**:
  - ○ Set up delivery tracking system.
  - ○ Develop frontend for showing delivery status to users.
  - ○ Implement notifications for delivery updates.
- **Deliverables**:
  - ○ Real-time delivery tracking for users.

Testing and Launch

- **Goal**: Ensure the system is bug-free and ready for launch.
- **Tasks**:
  - ○ Conduct thorough testing of all features.
  - ○ Fix any bugs or issues found during testing.
  - ○ Deploy the app to Vercel.
- **Deliverables**:
  - ○ Fully tested and deployed application.
